📁 Portfolio

Education

Indian Institute of Information Technology, Allahabad

2023 – 2025

Master of Technology in Software Engineering | GPA: 8.11/10

Allahabad, India

Yeshwantrao Chavan College of Engineering, Nagpur

2018 – 2021

Bachelor of Engineering in Computer Engineering | CGPA: 7.11/10

Nagpur, India

Work Experience

CAMS (Computer Age Management Services)

Jul 2025 – Present

Software Development Engineer I

Chennai, India

◦ **Project Odin: ARN Looker Mapping**

- Implemented multi-tenant **Row-Level Security (RLS)** in Looker using hierarchical ARN mapping logic to securely isolate distributor data across 100+ financial tenants.
- Designed ARN → CONS → DISTRIBUTOR mapping workflows to manage secure and scalable distributor-level data access across analytics dashboards.

◦ **Project Odin: API Modernization Initiative**

- Modernized legacy enterprise services by designing REST, GraphQL, and gRPC APIs, reducing inter-service latency and de-risking migration via side-by-side parallel-run validation.
- Developed APIs to support replay and parallel-run workflows for comparator systems, enabling side-by-side validation between legacy and modernized services.

Projects

Multi-Threaded Proxy Server with and without Cache (C, Semaphores, Client-Server Architecture)

- Developed a scalable multithreaded HTTP proxy server in **C** using pthreads for concurrent client handling.
- Integrated **LRU caching** to minimize redundant server calls and improve response times.
- Ensured thread-safe operations using semaphores and **mutexes** for synchronization in critical sections.
- Built custom HTTP request parser and socket-level forwarding with no external libraries — all protocol handling written manually to understand the full request lifecycle.

MediSync – Healthcare Portal (Spring Boot, React.js, MySQL, RabbitMQ, Webhooks, JWT, SSE)

- Developed a secure healthcare portal enabling health record transfers using **ABDM APIs** and **FHIR standards** in a microservices architecture.
- Designed FIGMA mockups, built backend services with **Spring Boot**, developed frontend with **React.js**, and contributed to database schema design in **MySQL**.
- Chose RabbitMQ over direct HTTP calls for async inter-service communication to decouple services and prevent cascading failures; used SSE over WebSockets for lightweight real-time frontend updates.
- Ensured secure communication using **JWT-based authentication** and **role-based access control (RBAC)**.

Technical Skills

Languages: Java, C++, C, JavaScript, SQL

Backend Development: Spring Boot, RESTful APIs, Microservices Architecture

Frontend Development: HTML, CSS, ReactJS

AI/ML: LLM Integration, Prompt Engineering, RAG Pipelines, Looker Explore Assistance (Vertex AI)

DevOps & Cloud: Google Cloud Platform (GCP), Docker, AWS, CI/CD, Linux

Databases: MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman

Achievements

- **GATE CSE 2023:** Secured All India Rank 3409 (among 100,000+ candidates).
- **Problem Solving:** Solved 500+ coding problems on LeetCode, Codechef, and GFG, demonstrating consistent problem-solving practice.
